| Client | Buildcorp Contracting NSW | Duration | Sep 2016 to Jun 2018 |
| Location | Sydney, NSW | Value | \$1.1M |
| Details | Decotec's scope included several components which required engineered demolition methodologies such as; removal of the link bridge, modification of 3 levels of cantilevered reinforced concrete and demolition of concrete facade containing friable and bonded asbestos . Safety, quality, environmental and interfacing obstacles were overcome by Decotec's management team which included experienced Project Engineers and Demolition Supervisors to design, coordinate and supervise the works. | | |
