

# AVON DAM RD BRIDGE DEMOLITION

## DATE

Nov 2020 - Feb 2021

## LOCATION

Bargo, NSW

## CLIENT

Select Civil

## VALUE

\$350K

The 4 span bridge was cut into 12 tonne sections and lifted onto semi trailers using a 350 tonne crane. The trucks reversed each beam back up a 1km narrow access road to the stockpile area for processing.

*"Josh and his team provided a detailed methodology for the works in a difficult location and an environmentally sensitive area (WaterNSW catchment). They completed the works without any issues and to a very high standard. We would not hesitate to use Decotec in the future."*
